MATH CROSSWORDS

Puzzle 1 solution • Follow one box at a time

Across Down Both Orange outline: the box we are working on

1. Pick A: look across, then down

10	×	A	×	B	=	180
	×		×			
	C	×	10	×	6	=	F
	×		×			
D	×	10	×	E	=	60
	=		=			
	150		120			

Original puzzle: no answers filled in.

Across: top row
10 × A × B = 180
180 ÷ 10 = 18, so A × B = 18.
A could be 1, 2, 3, 6, 9, 18.

Down: left column
A × C × 10 = 150
150 ÷ 10 = 15, so A × C = 15.
A could be 1, 3, 5, 15.

Keep the numbers on both lists:
1, 3.
These are the only 2 choices to try.

2. Try A = 1: follow B down

10	×	A 1	×	B 18	=	180
	×		×			
	C	×	10	×	6	=	F
	×		×			
D	×	10	×	E	=	60
	=		=			
	150		120			

Orange numbers are a try, not filled answers.

Start in the top row.
We found A × B = 18.
If A = 1, B = 18 ÷ 1 = 18.

Now look down from B.
B × 10 × E = 120
120 ÷ 10 = 12, so B × E = 12.
With B = 18, we need 18 × E = 12.

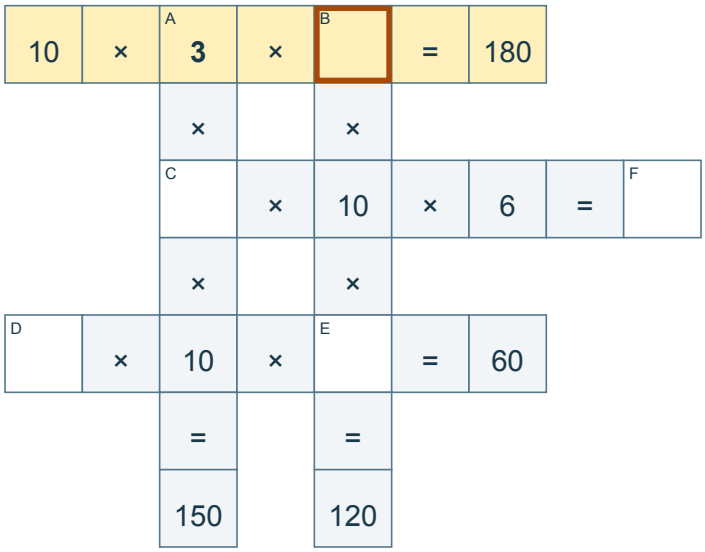

Even one group of 18 is bigger than 12.
No positive whole number fits E.
Cross out A = 1.

The other choices failed. Write 3 in A.

Stay in the top row to find B.
A × B = 27
3 × B = 27
3 × 9 = 27

Write 9 in B.
Check this choice as you fill the other boxes.

4. Pick C: look down the left column

Only answers found earlier are filled in.

A is already 3.
3 × C × 10 = 210
210 ÷ 10 = 21, so 3 × C = 21.

Which number fits?
3 × 7 = 21
Write **7** in C.

Check this column:
3 × 10 = 30; 30 × 7 = 210.

E is already 8.
D × 10 × 8 = 320
320 ÷ 10 = 32, so D × 8 = 32.

Which number fits?
4 × 8 = 32
Write **4** in D.

Check this row:
4 × 10 = 40; 40 × 8 = 320.

Puzzle 6 solution • Follow one box at a time

Across Down Both Orange outline: the box we are working on

1. Pick A: look across, then down

10	×	A	×	B	=	350
	×		×			
	C	×	10	×	9	=	F
	×		×			
D	×	10	×	E	=	630
	=		=			
	100		630			

Original puzzle: no answers filled in.

Across: top row
10 × A × B = 350
350 ÷ 10 = 35, so A × B = 35.
A could be 1, 5, 7, 35.

Down: left column
A × C × 10 = 100
100 ÷ 10 = 10, so A × C = 10.
A could be 1, 2, 5, 10.

Keep the numbers on both lists:
1, 5.
These are the only 2 choices to try.

2. Try A = 1: follow B down

10	×	A 1	×	B 35	=	350
	×		×			
	C	×	10	×	9	=	F
	×		×			
D	×	10	×	E	=	630
	=		=			
	100		630			

Orange numbers are a try, not filled answers.

Start in the top row.
We found A × B = 35.
If A = 1, B = 35 ÷ 1 = 35.

Now look down from B.
B × 10 × E = 630
630 ÷ 10 = 63, so B × E = 63.
With B = 35, we need 35 × E = 63.

Count in groups of 35: 35, 70. You skip 63.
No positive whole number fits E.
Cross out A = 1.
